EXPERIENCE

Full Stack Developer

Octaloop Technologies

November 2023 - Present, I11-3 Islamabad Near Police line

- **Developed and deployed** a comprehensive **Web3, Blockchain** application using React.js Next.js for front-end development, integrate **smart contracts** and Node.js with Express for back-end services.

Front-end Developer | UX/UI

At Optimize

January 2023 - October 2023, Bahria Town Phase 4 Civic Center

- **Designed and developed** responsive web applications using **React.js**, improving user engagement by 50% through enhanced UI/UX components and dynamic content rendering.
- **Contributed to the UX/UI design process by creating wireframes, mockups, and prototypes in Figma**, ensuring intuitive navigation, visually appealing layouts, and a seamless user experience.

Front-end Developer

Daxyne

November 2020 - December 2022

- **Initiated a career in frontend development at Daxyne**, gaining practical experience in building and maintaining web applications by applying foundational knowledge of HTML, CSS, JavaScript, jQuery, Bootstrap and tailwind.

PROJECTS

HypeBid

Kaizen Global • hypebids.netlify.app/

- Built a scalable and efficient platform on the **Web3** Ethereum blockchain to handle large volumes of transactions and user interactions.
- Implemented secure and transparent smart contracts to facilitate meme coin launches and token omics.

Extented Trust

OctaLoop Technologies • www.extendedtrust.ca/

- Implemented integration to provide secure and transparent transaction processes, boosting user confidence.
- Leveraged React.js to create a visually appealing and intuitive dashboard, enhancing overall user satisfaction.

World War 0x

Freelance • worldwar0x.com/

- Developed a robust frontend for the World War 0x web application using ReactJS and NPM packages.
- Optimized the frontend for fast loading times, reducing page load time by 30% compared to previous versions.

Neolin Investment

Octaloop Technologies • neolin-investment.vercel.app/

- Created an intuitive and visually appealing website for Neolin Investment.
- Improved loading times and overall performance for a better user experience.

ProxyHaze

Freelance • proxy-site-user.vercel.app/index.html

- Created an intuitive and visually appealing website for Proxy Haze, enhancing the user experience (Website: <https://saadmeer.github.io/proxySite/>).
- Integrated robust security measures to protect user data and build trust.

GameWrap

Freelance • gamewrap.net/

- Increased user satisfaction by 20% through a visually appealing and intuitive frontend design.
- Reduced average page load time by 35% to improve user engagement and reduce bounce rates.
- Ensured compatibility across 95% of devices and screen sizes, improving user experience for a diverse audience.

EDUCATION

Bachelor of Science in Software Engineering

International Islamic University • Islamabad • 2023 • 3.21

SKILLS
